01 WHAT IS HOCL?

Hypochlorous acid (HOCl) is a naturally occurring oxidant that is produced by white blood cells within the human body; it acts as the main ingredient used by our immune systems (phagocytes) to destroy disease-forming pathogens.

Due to the antimicrobial properties and safety aspects of HOCl it can be adapted to almost any industry in solving challenges.

HOCL IS SPECIAL AND WILL BE THE FUTURE STANDARD WITHIN VARIOUS INDUSTRIES THROUGHOUT THE WORLD. SOME OF ITS PROPERTIES THAT RESULT IN ITS EFFECTIVENESS IS AS FOLLOWS

ULTRAPURE® EYE DROPS
