ULTRAPUREHOCL.COM

What is HOCL?

Hypochlorous acid (HOCl) is a naturally occurring chemical that is produced by white blood cells within every human's body. It acts as the main ingredient used by our immune systems (phagocytes) to destroy disease-forming pathogens (bacteria, fungi and viruses) within the body.

HOCL is:

Non-toxic

Natural

Anti-viral

Anti-fungal &
anti-bacterial

No side effects

What makes the UltraPure HOCL range of products unique?

We have spent many years developing a patented proprietary manufacturing method that consistently ensures we produce a unique and extremely pure solution of HOCL (99.99% pure) that mimics the quality of HOCL made in the human body.

We have adapted this pure solution to various products that will positively assist in a variety of issues one can experience in day to day life.
